PROFESSIONAL SUMMARY

BS Computer Science student at Biliran Province State University who designs and builds user-friendly systems. Experienced in UI/UX design and prototyping in Figma, system planning and analysis, and machine learning for text classification. Built Ziren, an emergency response system with a mobile app and responder dashboard, and UniFind, a campus lost-and-found web app.

EDUCATION

Bachelor of Science in Computer Science
Biliran Province State University

CORE COMPETENCIES

- UI/UX Design and Prototyping (Figma wireframes and prototypes, responsive layouts)
- System Planning and Analysis (requirements, workflow diagrams, database design)
- AI and Machine Learning (text classification, NLP, model training and evaluation)
- Technical Documentation and Research (thesis, software testing, system manuals)

SKILLS

- **Programming Languages:** Python, JavaScript, HTML, CSS, SQL
- **Frameworks:** Django, Tailwind CSS, Bootstrap
- **AI and Data:** Machine Learning, Natural Language Processing (NLP), TF-IDF, Logistic Regression
- **Tools:** Figma, Canva, Jupyter Notebook, Visual Studio Code, Git and GitHub, Microsoft Office, Google Workspace

PROJECTS

Ziren | Emergency Response System for Biliran (Mobile App and Web Dashboard)

- Mobile app for residents to report fire, medical, accident, crime, and calamity incidents.
- Responder dashboard with incident severity, map route from the nearest station, and response time.
- AI model that suggests incident type and severity, validated by a responder before dispatch.

UniFind | Campus Lost-and-Found Web Application

- Web app for reporting lost and found items with photos, category, and location.
- Search, priority labels, messaging, and notifications between users.
